Education

Doctor of Philosophy in Biological and Biomedical Sciences
Oakland University, Rochester, Michigan, 2015-2020

Master of Arts in Biology
Oakland University, Rochester, Michigan, 2013-2014

Bachelor of Science in Applied Biological Sciences
Concentrations: Animal Physiology and Zoology
Arizona State University, Tempe, Arizona, 2007-2010

Research Experience

Postdoctoral Research: Department of Biological Sciences, Oakland University

- Dynamical modeling of microparasitic infection on individual hosts and entire host populations (Thomas Raffel, Ph.D.)

Dissertation Research: Department of Biological Sciences, Oakland University

- Environmental drivers of snail-borne parasitism (Thomas Raffel, Ph.D.)

Undergraduate Research: Department of Applied Sciences and Mathematics, Arizona State University

- Spring 2010: Biomechanical analyses of swimming among fish species (Course Project - Heather Bateman, Ph.D. and Maxim Sukharev, Ph.D.)
- Spring 2010: Various environmental taxis in the marine dinoflagellate *Prorocentrum micans* and applications toward harmful algal blooms (Course Project - Marilyn Enloe)
- Spring 2010: Herpetological biodiversity survey on Mesa Gateway Regional Airport (Individual Instruction - Heather Bateman, Ph.D.)
- Spring 2010: Development of a fluorescence polarized assay for S100B protein (Individual Instruction - David Madar, Ph.D.)
- Fall 2008: Producing a West Nile virus vaccine through transgenic tobacco plants (Individual Instruction - Qiang Chen, Ph.D.)

Research Interests

- Species interactions and temperature – Modeling temperature effects on metabolism to predict species interactions such as host-pathogen systems (e.g., trematode flatworms, amphibian chytridiomycosis)
- Disease ecology – Predicting the spatial and temporal dynamics of organisms and their diseases and pathogens by investigating effects on both host and pathogen biology
- Open-source technology – Developing open-source software and hardware solutions for experimentation and field research methods

Funding Sources

Grants:

- *CAREER: A metabolic theory approach to the thermal biology of parasitism*
  The goals of this project are to test the core assumption that different organisms and physiological processes have similar values and thermal acclimation responses for key MT model parameters, to test the ability of MT based models to predict parasite transmission in variable-temperature environments, and to delve into the cellular and molecular mechanisms underlying thermal acclimation effects on host-parasite interactions.
  Source: National Science Foundation (IOS-1651888)
  Role: Senior Personnel (20%); PI was Thomas R. Raffel (Oakland U.)
  Effective Dates: 04/2017 to 08/2022 (est.)
  Cost: $964,898

- *Exploring swimmer's itch drivers in southern Michigan*
  The goal for this grant is to determine the environmental drivers of avian schistosomes that cause human cercarial dermatitis in understudied areas in southern Michigan.
  Source: Michigan Swimmer's Itch Partnership
  Role: Senior Personnel (30%); Co-PIs were Thomas R. Raffel (Oakland U.) & Deanna M. Soper (U. of Dallas)
  Effective Dates: 06/2019 to 06/2020
  Cost: $29,558

- *Early detection of harmful algal blooms (HAB) using environmental risk assessment and a tiered citizen-science approach to sampling*
  The goal for this grant is to develop a cost-effective and flexible HAB monitoring framework which incorporates four emerging technologies: (1) a HAB state-level risk map; (2) multiplex cyanotoxin qPCR; (3) solid phase adsorption toxin tracking (SPATT); and (4) an innovative smartphone app; and combine them with elements of traditional water quality monitoring to improve predictions of HAB risk in Michigan lakes.
  Source: Michigan Department of Environmental Quality
  Role: Senior Personnel (15%); Co-PIs were David C. Szlag & Thomas R. Raffel (Oakland U.)
  Effective Dates: 09/2016 to 09/2018
  Cost: $207,135

Awards and Scholarships:

- 2017: Recipient, Oakland University Student Travel Award ($250)
- 2017: Recipient, Oakland University Biological Travel Award ($250)
- 2014: Recipient, Oakland University Provost Graduate Student Research Award ($2,000)
- 2007-2010: Recipient, Arizona State University Provost Scholarship (Full Tuition Support)

Academic Service

Journal Review: Journal of Animal Ecology, Journal of Parasitology, Knowledge and Management of Aquatic Ecosystems

Teaching Experience

- **Teaching Assistant**: September 2015 to December 2019
  Prepare and conduct lab sections of BIO 1201 (General Biology). F15, W16, S16, W19
  Prepare and conduct lab sections of BIO 3330 (Ecology). W17, W18
  Prepare and conduct lab sections of BIO 4320 (Medical Parasitology). F19
  Oakland University, Department of Biological Sciences, Rochester, MI, USA

- **Graduate Assistant**: September 2016 to April 2017
  Assist with grading duties for HC 1000 (First Year Colloquium: Making Discoveries).
  Mentoring students through HC thesis proposal process and writing for HC 3900 (Introduction to the Thesis).
  Organize and develop a student shadowing program and field trip for underserved high school students.
  Oakland University, Honors College, Rochester, MI, USA

- **Summer Biology Lab Assistant**: 2015-2017
  Prepare and assist with lab activities for AP Biology teacher professional development and certification.
  Oakland University, Department of Strategic Programs and Academic Affairs, Rochester, MI, USA

- **Marine Science Instruction Intern**: September 2010 to December 2010
  Teach marine science topics to visiting school groups ranging from elementary to high school level in classroom and field settings.
  Project: To develop a training guide of flora and fauna for incoming staff members.
  Seacamp Incorporated/Newfound Harbor Marine Institute, Big Pine Key, FL, USA

Outreach and Volunteer Service

Scientific:

- 2018-2019, Project Upward Bound Summer Program, Thermal Biology Lab – Lab Assistant, Oakland University, Rochester, Michigan, USA
- 2018, Project Upward Bound College & Career Day Facilitator & Presenter, Oakland University, Rochester, Michigan, USA
- 2016-2017, Science Fair Judge, International Technology Academy, Pontiac, Michigan, USA
- 2015-2017, Science Fair Judge, Chandler Park Academy, Harper Woods, Michigan, USA
- 2015, Water Pollution Presenter, Notre Dame Preparatory, Pontiac, Michigan, USA

Other:

- 2012-present, Extra Life Marathon Participant. Total individual fundraising: $31,960.15 USD (as of May 08, 2021)
- Extra Life Detroit, Michigan Guild (Officially affiliated with Children's Miracle Network)
  - President, 2016-present (Market fundraising: $376,528.61 USD as of Jan. 01, 2021)
  - Founding Member, 2015
- 2016-present, Children's Miracle Network Momentum attendee & Extra Life United participant
- 2019-present, DonorDrive Peer-to-Peer Fundraising Research Panelist
- 2020-present, Beaumont Children's Business Ambassador Group Member
- 2019, Extra Life Lead Angel award for exceptional service
